CENTER NEWS!

Center Based

Ms. Peggy & Ms. Caitlin will continue working on letter and name recognition as well as focus on rhyming through readings of Dr. Seuss and other unforgettable Early Childhood nursery rhymes such as Mother Goose. They will incorporate learning through various activities which talk about Spring time and the emerging of flowers and tree buds to the appearance of forest animals from their Winter habitats. They will be looking for these changes via everyday experiences outside as well as a field trip to Burr Oak nature trail. Here they will look for signs of new life and gather materials to bring back to share.

Home Based

Ms. Laurie will be introducing what Engineering looks like through the lens of Early Childhood. Children will work on problem solving, through imagination and planning, creating and improving! They will practice these scientific processes through cup stacking, block building and brainstorming to engineer their very own Leprechaun trap!

Early Head Start

Ms. Patti will be initiating activities that focus on gross motor conditioning. "Gross motor skills are the abilities required to control the muscles of the body for large movements such as crawling, walking, jumping running and more. As children gain control of their bodies they start to build the necessary strength to learn and grow!" Some opportunities Ms. Patti will present to increase gross motor skills are dancing, playing catch, walking the line for balance and designing a homemade obstacle course for exploration.

Family Support

Ms. Laurie will be offering help to families to build a resume/skills list, enabling them to stay current, up to date on their job skills and for possible future employment opportunities.

Did you know?

Early art experiences are all about the process of sensory exploration, and are an important part of young children's development. Every child is born an artist. They just have to be given the opportunity to create! Some ways to explore art include using a flower as a paintbrush, using a seashell to make prints, painting rocks, and even painting with mud! Remember, children are 100% washable. Mess is part of the process!
